Summary

• Technical Skills:

-Familiar with a range of technologies commonly used in web development, including React, Redux, Formik, TailwindCSS, Bootstrap, Java Spring, PostgreSQL, and API services.

• Project Experience:

-Worked on projects involving complex functionalities such as shopping cart management, user authentication (including login and registration), and database interactions.

• Relevant Projects or Activities

• Product Management | 2024

- Description: Collaborated with AI Assistant to develop a Product Management system, incorporating features such as inventory management and customer relationship management. Implemented performance optimization techniques such as debounce for user product search, enhancing user experience and system efficiency. Utilized React for frontend development, Redux for state management, and integrated with backend APIs written in Java and Spring Boot for data handling.

- Technologies/Skills Used: React, Redux, Java, Spring Boot, PostgreSQL, Backend APIs integration, AI Assistant collaboration.

• Individual Armament | 2024

- Description: Developed the Individual Armament project to fetch and display crime rates data across all USA states. Implemented an interactive map of the USA where users can click on states to view corresponding data on a chart. Integrated framer-motion for smooth page transitions.

- Technologies/Skills Used: React, TailwindCSS, Axios (data fetching), React-charts (data visualization), framer-motion (animations).

• Open Library Search App | 2023

- Description: Developed an Open Library Search App that utilizes RapidAPI calls to retrieve books matching user input. Implemented dark and light modes for user preference.

- Technologies/Skills Used: React, TailwindCSS, RapidAPI, fetch API.

And many more.

Experience

Information Technology Help Desk

Ayhan Market

Mar 2020 - Aug 2020 (6 months)

Responsibilities:

Database Management: Registered goods and products into the database system, ensuring accurate and up-to-date information for inventory management and sales tracking.

Technical Support: Provided technical assistance and troubleshooting for hardware and software issues, including configuring devices such as computers, printers, and networking equipment to ensure they functioned optimally.

Achievements:

Received positive feedback from users and management for effective problem-solving and technical support skills.

Contributed to the successful implementation of IT projects and initiatives, enhancing overall IT operations and user experience.

Education

Firat University

Economics and Administrative Sciences

Sep 2018 - Jun 2023
